Hannah McCullough

Phoenix, AZ | (602) 903-0852 | mccullough.hannah@outlook.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SOFTWARE ENGINEER

Innovative full-stack web developer with skills in building applications with a user-experience approach by utilizing Ruby, Rails, JavaScript, React, SQL databases, and RESTful API architecture. With a customer-service, management, and athletic background, I bring strong skills in client relations, collaboration, and leadership.

TECHNICAL SKILLS

JavaScript, React, Ruby on Rails, HTML, CSS, Postgres, SQLite, Git, WordPress

TECHNICAL PROJECTS

Housd, [GitHub](#)
Home maintenance checklist and service booking application designed with dual-user types for homeowners and service providers
- Modeled custom database schema and REST API with Active Record, Postgres, and Rails
- Created two different dashboards with routing based on user login information determining user's profile type
- Utilized Auth and bcrypt to authenticate user login and authorize user functionality based on user type

Strength Trainer, [GitHub](#)
Strength training application tracker equipped with organizational workout logging and data calculations based on user input
- Developed Rails API and Postgres back end with endpoints for users and their workouts
- User interface implemented with JavaScript/React, reactstrap, and CSS
- Authenticated users at login by encrypting identifying account information via Auth and bcrypt

Coffee Me Recipes, GitHub: [Frontend](#) | [Backend](#)
SPA to get and share coffee recipes with search and filtering tools and the capability to post new recipes
- Engineered back end using Active Record and Rails
- Implemented modern front end with JavaScript/React, Material UI, and CSS
- Designed layouts and components to provide a seamless user experience while navigating the application
